SENIOR
EDITION –II

(JULY-SEPTEMBER 2022-23)

Success isn't always about greatness. It's about consistency. Consistent hard work leads to success.

Greatness will come.

Dear Parent/Student

Helen Keller rightly says that the world is moved along not only by the mighty shoves of its heroes, but also by the aggregate of the tiny pushes of each honest worker.

The school is an incarnation of self-respect, love, affection, sensibility; responsibility and compassion which puts the students into a “State of flow” and makes them genuinely want to learn. We recognize, appreciate, applaud and foster the fine blend of sensibilities in a child changing a negative outlook from drab and demoralized to bright and expectant. MVN attains its eminence in the first place through the achievement of children. The newsletter also espouses the School spirit which is built up within the school through the collective actions, thoughts and aspirations. All these, I believe would spur higher growth and enterprise in children. This newsletter is a pious attempt to see our budding talents give shape to their creativity and learn the art of being aware because I believe that our success depends upon our power to perceive, the power to observe and the power to explore.

FROM THE COUNSELLOR'S DESK

Different isn't less, same isn't more

Imagine a world where everyone is the exact replica of everyone else, same physical appearance and same mental set up. How monotonous this world will become and how boring life would be? We all know that just like our faces, our minds are different too. But knowing it and realizing it are two different things. To accept and realize one's uniqueness is not a job for the faint hearted. It needs tremendous courage to stand on your own ground, accept the difference and realize the uniqueness within but if you do, it gives you an edge that no one else quite has.

When you observe others around who are more talented, more intelligent and more capable than you, you may get insecure and frightened and strongly feel that you need to be like them; so you start copying them blindly. Obviously, this will never work and when that happens, you get even more insecure, frightened and puzzled.

Whenever you are in this dilemma, first of all, ground yourself. Remind yourself of your strengths. Reassuring yourself will help you settle your self-doubts and make you calm; and only a calm mind can think properly. Now start thinking how you can utilize your strengths and uniqueness to get the best results possible in the situation. This will be your own way of doing things and it will definitely give you the best possible results.

When we get threatened by others' performance, we are prone to minimize our good points and maximize our weaknesses. At such times the most important thing is to think rationally, neither too positive nor too negative. See the situation as it is and not as you feel it is. If you can't then ask someone who understands you well to help you rationalize your viewpoint.

The bottom line is, No matter how unique you are and how good strategy you planned to create a unique life ahead, the most important thing is to convert it to action then only the true magic will happen. Unique thought and action together leads to results.

Take the step towards realizing your uniqueness today. Best wishes

August 15th, 1947 is etched deep into history and people's collective memory as the day that India achieved independence. Over the last 75 years, India has channeled her civilizational strengths and cultural diversity into a brand new shared future, and opportunities for achievement, progress and prosperity.

The entire country is observing this historic milestone being achieved by taking part in the 'Azadi Ka Amrit Mahotsav' to commemorate the 75 years of independence. PAPER CRAFT ACTIVITY

Paper craft is a collection of crafts using paper or card as the primary artistic medium for the creation of two or three-dimensional objects.

The middle schoolers were given a perfect platform to exhibit their art and craft in Thursday activity class. Class VI students prepared beautiful wall hangings, containers, pots etc. with paper mache whereas Class VII students designed beautiful paper bags and our ingenious VIII graders showcased their exceptional creativity by making vibrant and attractive folders. The activity thus helped to enhance the aesthetic skills of the students.

RAKHI AND KITE MAKING ACTIVITY

“A festival is an occasion of enjoyment and celebration which promotes social interaction and harmony.”

Children will remember an important day only if they are told what the occasion signifies. So a celebration makes them aware of the world in a more fun way. Celebrating events and festivals in our school has become an integral part of learning and building a strong cultural belief. Such celebrations bring the students closer to each other's traditions and cultural beliefs and develop respect and understanding for each other's customs and traditions.

To mark the importance of Independence Day and Raksha Bandhan students of Classes 6&7 enthusiastically participated in Rakhi and Kite making activity respectively. The students showcased their talent by making beautiful and creative kites and rakhis.

These are intended to make the children comprehend in a hands'-on way, the basic principles of how things work. Numerous scientific instruments were on display in the museum. Divided into a number of galleries, each gallery is dedicated to a distinctive theme and contains several exhibits, which are based on the different scientific laws and theories.
